

# UNDERGRADUATE TRANSFER RETENTION RATES

Average incoming transfer cohort size: **84 students**

Average first-year retention rate:

77%

Average second-year retention rate:

70%

Average third-year retention rate:

67%

Average fourth-year retention rate:

65%

Average six-year graduation rate:

63%

**Methodology:** This Infographic tracks incoming fall full-time transfer students, based on the fall census. The behavior of transfer students varies greatly from first-time freshmen. For example, transfer students entering a fall transfer cohort have a wide variety of earned credits and can be freshman students or high-ranking students. This creates large variances of actual semesters needed to graduate for each individual student comprising this population. Ten year retention averages have been used to attain a high-level picture of overall activity. Years 2013 to 2017 have been used to create an average six-year graduation rate.
